Executive Masters / Masters of science

The Executive Masters and Masters of Science accredited by the Conférence des grandes Ecoles are advanced programs leading to an institutional diploma, designed to develop high-level technical expertise. Governed by the rigorous standards of the Conférence des Grandes Écoles, these programs ensure strong scientific and pedagogical value, drawing directly from the institution's areas of excellence and staying at the forefront of research and innovation.

Structured around 350 to 450 hours of coursework followed by a six-month professional internship, these programs provide hands-on immersion in highly technical environments and foster close ties with socio-economic stakeholders.

While Executive Masterss focus on professional specialization with an international outlook and instruction in French, Masters of Science programs—taught entirely in English and aimed at English-proficient professionals—stand out for their strong international and academic orientation.

- Field of "Ecodesign of Buildings": Executive Master Green buildings
- Field of "Mobility": Master of Science in Mobility management

These programs are primarily intended for graduates holding a Master's degree (or equivalent) and professionals seeking to enhance their expertise in the sector.
