

Applications for our new Master of Science in Mobility Management are now open!

You wish to develop advanced skills in transport planning, data analysis, and mobility management, while also gaining both managerial and technical expertise to shape transport systems, policies, and regulations?
We are proud to announce the launch of our new international Master of Science Programme in Mobility Management at ENTPE, in partnership with Université Gustave Eiffel.

The Master of science in Mobility Management offers a multidisciplinary curriculum that bridges the fields of :

- **Spatial planning**
- **Transport economics**
- **Policy and planning**
- **Mobility engineering**

- **Urban environment**

It is designed to meet the growing demand for professionals capable of designing, managing, and implementing innovative mobility solutions that address key **environmental, economic, and social challenges.**

/// Academic and professional skills for international careers

This **one-year, full-time, English-taught programme** fosters academic and professional connections across borders, welcoming students seeking a high-level, specialised education that prepares them for international careers.
ENTPE's MSc in Mobility Management equips graduates with in-demand technical, analytical, and managerial skills for **urban planning and transport consultancy, government agencies and local authorities, international organisations, and technology and infrastructure companies.**

/// How to apply?

- For non-EU applicants: applications are open until the end of December
- For EU applicants: applications are open until the end of July
