

Publications

Each year, all ENTPE's scientific works are included in the laboratories' catalogue of publications.

This collection is designed to disseminate the scientific works of the research units under the supervision of ENTPE, including: the Building and Civil Engineering Laboratory (LGCB), the Tribology and System Dynamics Laboratory (LTDS, UMR CNRS 5513), the Transport and Traffic Engineering Laboratory (LICIT), the Natural and Anthropic Hydrosystems Ecology Laboratory (LEHNA, UMR CNRS 5023), the Transport, Urban Planning and Economics Laboratory (LAET, UMR CNRS 5593), and the City, Spaces and Society Laboratory (UMR CNRS 5600).

These works therefore cover 3 main disciplines:

- Civil engineering, engineering and system science;
- Space, territories, societies: spatial planning, geography, sociology, economics and political science;

- Science and engineering of/for the environment: geosciences, hydrology, biology and biochemistry, ecotoxicology and ecology.
