Catherine Marquis-Favre
ENTPE - Université de Lyon
3 rue Maurice Audin, 69518 Vaulx-en-Velin Cedex

Research topics

- Noise Annoyance (sources in isolation and combined noise sources)
- Soundscape
- Sound quality of structures.

Publications since 2005

Publications HAL
(contact me if you need a reference not available to you)

https://doi.org/10.1121/1.5082296

GILLE L.-A., MARQUIS-FAVRE C. and LAM K.-C.

MAIGROT P., MARQUIS-FAVRE C. AND PARIZET E.
Two laboratory methods of assessing annoyance due to railway noise and vibration (L).

Assessment of annoyance due to urban road traffic noise combined with tramway noise.
http://doi.org/10.1121/1.4973518

GILLE L.-A., MARQUIS-FAVRE C. and WEBER R.
Aircraft noise annoyance modeling: Consideration of noise sensitivity and of different annoying acoustical characteristics.

GILLE L.-A., MARQUIS-FAVRE C. and WEBER R.
Noise sensitivity and loudness derivative index for urban road traffic noise annoyance computation.
Gille L.-A., Marquis-Favre C. and Morel J.
Testing of the European Union exposure-response relationships and annoyance equivalents model for annoyance due to transportation noises: the need of revised exposure-response relationships and annoyance equivalents model.

Gille L.-A., Marquis-Favre C. and Klein, A.
Noise annoyance due to urban road traffic with powered-two-wheelers: quiet periods, order and number of vehicles.

Morel J., Marquis-Favre C., Gille L.-A.
Noise annoyance assessment of various urban road vehicle pass-by noises in isolation and combined with industrial noise: A laboratory study.

Marquis-Favre, C., Morel, J.
A simulated environment experiment on annoyance due to combined road traffic and industrial noises.

Trollé, A., Terroir, J., Lavandier, C., Marquis-Favre, C. and Lavandier, M.
Impact of urban road traffic on sound unpleasantness: A comparison of traffic scenarios at crossroads

Trollé, A., Marquis FAVRE, C. and PARIZET, E.
Perception and annoyance due to vibrations in dwellings generated from ground transportation: A review.

Spectral and modulation indices for annoyance-relevant features of urban road single-vehicle pass-by noise.

Trollé, A., Marquis-Favre, C. and Klein, A.

Trollé, A., Marquis FAVRE, C. and Klein, A.

Trolley A., Marquis-Favre C. Hamzaoui N.
Auditory evaluation of sounds radiated from a vibrating plate inside a damped cavity: adjustment of the frequency resolution of vibro-acoustical computing.
MOREL J., MARQUIS-FAVRE C., VIOLLON S., ALAYRAC M.
*A laboratory study on total noise annoyance due to combined industrial noises.*

MOREL J., MARQUIS-FAVRE C., DUBOIS D., PIERRETTE M.
*Road traffic in urban areas: a perceptual and cognitive typology of pass-by noises.*

PIERRETTE M., MARQUIS-FAVRE C., MOREL J., RIOUX L., VALLET M., VIOLLON S., MOCH A.
*Noise annoyance due to industrial and road traffic combined noises: a survey and a total annoyance model comparison.*

PIERRETTE M., MARQUIS-FAVRE C., MOREL J., RIOUX L., VALLET M., VIOLLON S., MOCH A.

ALAYRAC, M., MARQUIS FAVRE, C. and VIOLLON, S.
*Total annoyance from an industrial noise source with a main spectral component combined with a background noise*

ALAYRAC, M., C. MARQUIS-FAVRE, VIOLLON, S., MOREL, J. et LE NOST, G.
*Annoyance from industrial noise: indicators for a wide variety of industrial sources*

HAMZAOU, N., TROLLÉ, A. and MARQUIS FAVRE, C.
*Benefit of sound perception for the analysis of acoustic radiation inside a cavity.*

TROLLÉ A., MARQUIS-FAVRE, C., HAMZAOUI, N.,
*Auditory evaluation of sounds radiated from a vibrating plate inside a damped cavity.*

MARQUIS-FAVRE C., FAURE J.
*Auditory evaluation of sounds radiated from a vibrating plate with various viscoelastic boundary conditions*
MARQUIS-FAVRE C., PREMAT E., AUBREE D.
*Noise and its effects - A review on qualitative aspects of sound. Part II: Noise and annoyance*
Acta Acustica United with Acustica, 91(4), 626-642, 2005

MARQUIS-FAVRE C., PREMAT E., AUBREE D., VALLET M.
*Noise and its effects - A review on qualitative aspects of sound. Part I: Notions and acoustic ratings*
Acta Acustica United with Acustica, 91(4), 613-625, 2005
